1.	Accenture	Assessing the Risk Exposure	Software	MS203	Miscellaneous
		of Properties in High-Wind			
		Areas: Reinsurance			
		companies may need to			
		accurately assess the risk			
		exposure of properties in			
		high-wind areas to			
		determine appropriate			
		premiums and coverage			
		limits. However, current			
		assessment methods may			
		be limited and not provide			
		a comprehensive			
		understanding of the			
		potential risks associated			
		with these properties. One			
		potential solution could be			
		to develop an Al-powered			
		risk assessment tool that			
		leverages satellite imagery			
		and weather data to			
		accurately assess the risk			
		exposure of properties in			
		high-wind areas, taking into			
		account factors such as			
		wind speed, building			
		materials, and geographic			
		location.			
2.	Accenture	Streamlining Claims	Software	MS204	Miscellaneous
		Processing for Wind-			
		Related Damage: When a			
		windstorm occurs,			
		reinsurance companies are			
		often inundated with			
		claims from policyholders			
		seeking coverage for			
		uamage to their property.			
		damage to their property. However, the claims

		processing process. This			
		could help reinsurance			
		companies process claims			
		more efficiently, improve			
		customer satisfaction, and			
		reduce costs associated			
		with manual			
		claims processing.			
3.		Develop a Smart home	Hardware &	MS205	Miscellaneous
		Hardware along with a	Software		
		mobile App to control a			
		Smart Home Solution.			
		Smart home hardware			
		should include on/off			
		control of all devices,			
		speed variations of FAN			
		and Electrical energy			
		consumption of connected			
		devices. The Mobile App			
		should have a very			
		interactive Interface,			
		showing the on/off status			
		of each device, On/off			
		status and speed level of			
		Fan and total electrical			
		energy consumed should			
		be displayed. Mobile App			
		should be custom			
		designed, ready made			
		available options on the			
		internet should not be			
		used.			
4.	ITSC Ltd	Recognition of fabricated	Software	MS201	Miscellaneous
٦.	1150 Eta	or Forged documents,	Software	1013201	Wilsecharicous
		helps organizations to			
		validate the authenticity of			
		certain activity happened			
		on the grounds but not			
		virtually fabricated.			
5.	DRMZ Tech	Generate and send PDF or	Software	MS202	Miscellaneous
٥.	שואועוב ופנוו	JPG certificate. The App	Juliwale	1013202	iviiscellalleous
		should include a template			
		in which data can be			
		changed. Also, the user will add the list of emails and			
		name of person in the App.			
		App ned to change the			
		name in each certificate			
		and send individual mail to			
		each person with			
		certificate attached.
